**(54) DEODORIZING DEVICE**

**(57)Abstract:**

**PROBLEM TO BE SOLVED:** To provide a compact deodorizing device capable of efficiently decomposing the malodor generated from garbage or the like.

**SOLUTION:** A photocatalyst unit 5 having an excitation luminous means 14 and a plurality of transmission contact photocatalyst filters 13 radially and spirally arranged around it is connected to a processing container 4 storing a bubble generating means 3 and water inside. An exhaust fan 7 is connected to the photocatalyst unit 5. A photocatalyst unit 8 having the excitation luminous means 14 and transmission contact photocatalyst filters 17 arranged spirally around it is arranged in the processing container 4.

## LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
